Create a Structured Study Plan

Start by mapping out a realistic timetable that covers all topics before exam day. Use the kit's **study guide outlines** to identify the main themes and allocate time based on your strengths and weaknesses. A typical plan might look like this:

- Reduce anxiety by becoming familiar with the pacing.

Review and Self Assessment

After each practice session, use the kit's self assessment tools to gauge your progress. Pay attention to:

- Questions you answered incorrectly.
- Patterns of mistakes (e.g., calculation errors).

Re visit those sections in the study guides or watch the relevant video lectures to reinforce learning.
