apa sample paper 7th edition

Published: September 19, 2026 | Index ID: #-

Introduction

When students, researchers, and academics embark on writing a scholarly paper, the first hurdle they often face is mastering the formatting guidelines of the American Psychological Association (APA). The 7th edition, released in October 2019, introduced significant changes to the APA style manual, making it more user friendly and inclusive. For anyone looking to produce a professional document, having a reliable **apa sample paper 7th edition**to reference is essential. This guide will walk you through every element of the format, from the title page to the reference list, and provide practical tips to avoid common pitfalls.

Why an APA Sample Paper Is Crucial for 7th Edition Writers

Writing an academic paper is more than just putting ideas together; it's about presenting them in a clear, consistent, and scholarly manner. A sample paper serves as a blueprint, illustrating how the APA 7th edition rules are applied in real contexts. By studying a well formatted example, you can:

- Understand the hierarchy of headings and subheadings.
- Observe how in text citations are integrated seamlessly.
- See the proper construction of a reference list and how different sources are formatted.
- Recognize common formatting nuances, such as the use of italics, bold, and spacing.
- Learn how to structure the abstract, keywords, and acknowledgments.

Key Differences Between APA 6th and 7th Editions

Before diving into the sample paper, it's helpful to highlight the main updates that distinguish the 7th edition from its predecessor. These changes affect everything from the title page to the reference format:

1. Title Page: The 7th edition allows a running head only for professional papers, not student papers.
2. Font Options: A broader selection of fonts (e.g., Calibri, Arial, Times New Roman) is now acceptable.
3. In text Citations: The use of "et al." after the first citation for works with three or more authors has been expanded.
4. Reference List: The format for URLs and DOIs has been simplified; URLs no longer require "Retrieved from."
5. Headings: The heading levels have been clarified, with a new level 5 for very specific subsections.
6. Bias Free Language: The manual now emphasizes inclusive language, encouraging writers to avoid gendered pronouns where possible.

Structure of an APA 7th Edition Sample Paper

A complete APA sample paper follows a strict structure designed to enhance readability and scholarly rigor. Below is an outline of the typical sections you'll find in a sample:

1. Title Page
2. Abstract
3. Keywords
4. Introduction

5. Method
6. Results
7. Discussion
8. References
9. Appendices (if necessary)

Each section serves a distinct purpose and adheres to specific formatting rules, which we'll explore in detail.

Title Page

The title page is the first impression of your paper. For a student paper, the 7th edition requires the following elements, centered both vertically and horizontally:

- Title of the paper (capitalized and centered)
- Author's name(s)
- Institutional affiliation
- Course number and title
- Instructor's name
- Due date

Unlike the 6th edition, a running head is not required for student papers, simplifying the layout.

Abstract

The abstract is a concise summary, typically 150–250 words, that captures the essence of the research. Key features include:

- A single paragraph without indentation.
- A brief statement of the problem, methodology, main findings, and implications.
- Use of the word "Abstract" in bold at the top.

Keywords

Immediately following the abstract, list 3–5 keywords that reflect the paper's main topics. Each keyword is separated by a comma, and the label "Keywords" is italicized and in sentence case.

Introduction

The introduction sets the stage, providing background, rationale, and the research question or hypothesis. It should:

- Begin with a hook that engages the reader.
- Include a brief literature review.
- State the purpose and significance of the study.
- Outline the structure of the paper.

Method

The method section details how the research was conducted. It typically contains subheadings such as Participants, Instruments, Procedure, and Data Analysis. Each subsection follows a clear, logical order and uses consistent formatting.

Results

Present the findings objectively, using tables, figures, and statistical summaries. APA 7th edition emphasizes clarity, so each table or figure should have a concise title and note if necessary.

Discussion

The discussion interprets the results, relates them back to the literature, and addresses limitations. It often concludes with future research directions and practical implications.

References

The reference list is a cornerstone of APA style, showcasing all sources cited in the paper. Key formatting rules include:

- Alphabetical order by the first author's surname.
- Hanging indent of 0.5 inches.
- Use of italics for titles of books and journals.
- Proper DOI formatting: "https://doi.org/xxxx".

Appendices

Include supplementary material such as raw data, questionnaires, or additional tables. Each appendix is labeled (Appendix A, Appendix B, etc.) and referenced in the main text.

Common Mistakes in APA 7th Edition Papers

Even seasoned writers can slip into formatting errors. Below are frequent mistakes and how to correct them:

1. Incorrect Heading Levels: Mixing heading styles can confuse readers. Stick to the APA heading hierarchy.
2. Inconsistent In text Citations: Ensure all citations match the reference list entries.
3. Improper Reference Formatting: Pay attention to punctuation, italics, and capitalization.
4. Overuse of Passive Voice: APA encourages active voice for clarity.
5. Ignoring Bias Free Language: Avoid gendered pronouns unless necessary.

Step by Step Guide to Formatting Your Paper

Below is a practical checklist you can follow while drafting your paper to ensure compliance with APA 7th edition standards.

1. Set 1 inch margins on all sides.
2. Choose a readable font (e.g., 12 point Times New Roman).
3. Double space the entire document, including references.
4. Insert a page number on the top right corner of every page.
5. Use 0.5 inch hanging indent for reference entries.
6. Align headings left, not centered or justified.
7. Include a running head only if required for professional papers.
8. Proofread for spelling and grammatical errors.
9. Cross check each in text citation with the reference list.
10. Ensure all tables and figures are labeled and referenced.

Formatting Tables and Figures

Tables and figures should be concise and self explanatory. Follow these guidelines:

- Number tables and figures consecutively (Table 1, Figure 1).
- Provide a descriptive title above the table or figure.
- Include a note below the table if needed.
- Use a consistent style for fonts and line spacing.

Using APA 7th Edition in Word and Google Docs

Both Microsoft Word and Google Docs offer templates for APA formatting. However, manual adjustments are often necessary to align with the 7th edition specifics. Tips include:

- Use the “Heading” styles for automatic heading formatting.
- Set line spacing to 2.0 and remove any paragraph spacing before or after.
- Apply hanging indents via the ruler or paragraph settings.
- Insert a page number using the header/footer tools.

How to Create an APA 7th Edition Reference Entry

Below is a quick reference table showing the format for common source types. Each entry includes the author(s), year, title, source, and DOI/URL if applicable.

Source Type	Reference Format
Journal Article	Author, A. A., & Author, B. B. (Year). Title of article. Title of Journal, volume(issue), pages. https://doi.org/xxxx
Book	Author, C. C. (Year). Title of book. Publisher.
Website	Author, D. D. (Year, Month Day). Title of page. Website Name. https://www.example.com
Conference Paper	Author, E. E. (Year). Title of paper. In Proceedings of the Conference Name (pp. pages). Publisher. https://doi.org/xxxx

In text Citation Variations

The 7th edition simplifies citation practices. Here are some common scenarios:

- One Author: (Smith, 2020)
- Two Authors: (Smith & Jones, 2020)
- Three or More Authors: First citation: (Smith, Jones, & Brown, 2020); Subsequent: (Smith et al., 2020)
- No Author: Use the title in place of the author: (“APA Guidelines,” 2020)

What to Do If You Encounter a Source Not Covered in the Manual

Academic research often involves unconventional sources—such as podcasts, social media posts, or personal communications. APA 7th edition provides guidelines for these as well:
